

FRENCH BOX RANGE

OVERVIEW

The “French Box”

With all of these features this is the only easel you will ever need. The three easels pictured all come with a Wooden Palette and are all virtually identical, except the Premier #13108: it does not have a metal tray liner.

Telescopic Legs

This feature allows these easels adjustable height for standing or seated use. Each leg can be independently shortened or lengthened to align uneven ground when outdoors.

Adjustable Incline

The work surface of these easels can be adjusted from horizontal through to vertical. This is ideally suited to mixed media and W/colourists where the incline can be adjusted throughout the painting for different effects.

Clever Design

Incorporating a sketch case, studio height, a table easel, storage area, and a palette, in a such compact design makes this the easel of choice for the artist seeking versatility and portability.

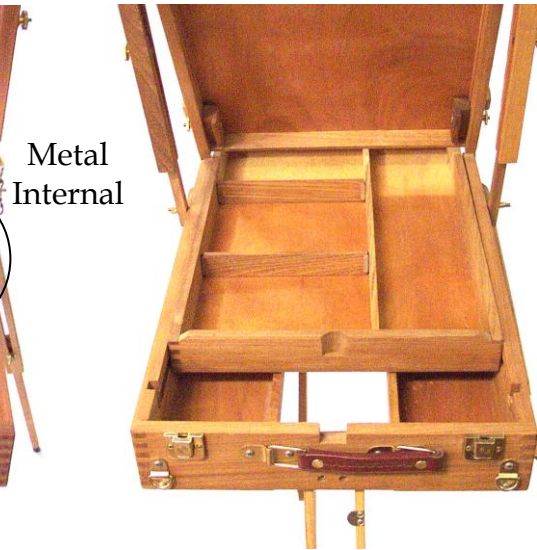

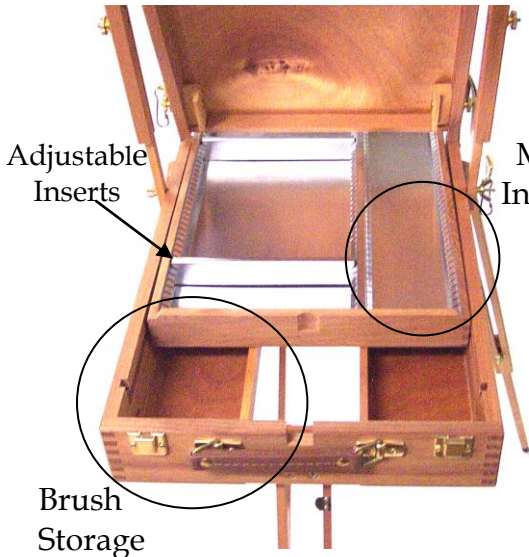

Compact Size

The French Box in a transportable state compacts to slightly larger than your average briefcase. The weight is in the storage area distributes evenly over the legs when at maximum canvas height in a heavily inclined position balancing the model and it will not tip when used as a Table Easel.

Any of these models are ideal for the Artist who enjoys working both indoors & out, those without room to accommodate the permanent fixture of a full sized Studio easel and those who would like the benefits of a table easel and the storage area without having to make a second purchase

FOR SALES OR FURTHER INFORMATION PLEASE CONTACT US OR VISIT IN STORE TO SEE THESE EASELS AND OTHER MODELS ON DISPLAY.
